Global Workforce
Planning and Talent
Acquisition Leader

Simon Taylor
Product & Technology |
AI | Transformation |
Board | Private Equity

Ronald Howson
Head of Page Consulting

Diane Ward
IIM Board member and
Interim within Talent
Acquisition

What to expect

Attendees can expect an insightful exploration of how interim talent will shape — and be shaped by — the intelligent economy.

The discussion will examine how strategic workforce planning is evolving to blend non-permanent expertise with advanced AI tools, enabling organisations to build more agile and adaptive resourcing models.

The panel will also consider what the “interim of the future” looks like: the capabilities they’ll need, how they’ll orchestrate AI to amplify impact, and how they can remain indispensable in a rapidly shifting landscape.

Finally, the session will unpack the forms of AI-driven transformation organisations are likely to pursue in the years ahead.
